Executive Summary

The 2009 OSU Survey of Alumni of Graduate Programs was conducted to identify institutional strengths and areas for improvement as indicated by recent graduates, to track the career and continuing education trends of recent graduates, to assess achievement of learning outcomes as perceived by alumni from individual academic programs, and to accomplish the State Regents’ mandate for assessing student and alumni satisfaction. The survey was conducted in January and February 2009 and targeted alumni of graduate programs who graduated in calendar years 2003 and 2007. The survey was administered as an online survey and as a telephone interview and included ‘common questions’ (related to employment and continuing education) and questions related to program outcomes for each degree program.

- **Response Rate.** A total of 989 interviews with alumni were completed, resulting in a response rate of 45.1%. When adjusted for alumni for whom a telephone number could not be determined and alumni who could not be reached in the US, the response rate to the survey was 82.2%.

- **Residency.** 54.7% of the alumni who participated in the survey were living in Oklahoma, and 45.3% were contacted out-of-state. States of residence are unknown for 14.4% of respondents.

- **Employment.** 91.5% of alumni reported that they were employed. Most alumni reported working for educational institutions (36.5%) or large corporations (29.1%). 15.5% were employed by small businesses or corporations, and 11.6% were employed by government agencies. Alumni most frequently reported that their annual salary was in the range of $75,000-99,999 per year (17.7%). 92.8% of employed alumni reported that their OSU education had prepared them very well or adequately for their current position.

- **Continuing Education.** 18.2% of alumni had completed or were currently enrolled in graduate programs or professional schools. 52.8% of these were enrolled in or had attended OSU graduate programs. 51.7% were pursuing or had completed doctoral degrees, 23.8% were pursuing or had completed Master’s degrees, and 8.7% were pursuing or had completed business degrees. 89.2% of alumni who went on to graduate or professional school stated that their OSU education had prepared them very well or adequately for their continued education.
Introduction

In a comprehensive assessment effort, many voices must be heard in order to gain a thorough understanding of the effectiveness of the curricula. Because the focus of assessment is on helping improve the preparation of graduates, one approach to addressing questions about preparation for the workplace is to ask graduates themselves (Banta and Palomba 1999). Alumni provide a logical source of evaluative feedback and a unique perspective on the application of curricula in practice.

Information from alumni also plays an important role in the process of academic assessment. Higher education in the United States has been undergoing critical scrutiny whereby parents, students, and government leaders alike are increasingly calling into question the value of a college degree. This scrutiny is fueled by the well-documented escalation of the costs of college attendance over the past two decades and concerns about the employment prospects and even the employability of college graduates (McGuire and Casey 1999). Against this backdrop, the pressure on colleges and universities to maximize and demonstrate effectiveness is at an all-time high. Because a college education is a lifelong investment with presumed dividends accruing for many years after graduation, it is logical to seek out answers to the public’s legitimate concerns through alumni surveys. Data from alumni surveys can be a valuable part of assessment efforts aimed at providing public accountability as well as evaluative information that can be used for program improvement.

The Oklahoma State University Survey of Alumni of Graduate Programs that was conducted in January and February 2009 sought, among other things, to identify the extent to which recent graduate program alumni were satisfied that they had received quality training in professional skills and abilities at OSU. The survey provided data to (1) identify institutional strengths and areas for improvement as indicated by recent graduates; (2) track the career trends of recent OSU graduate program alumni; (3) provide outcomes assessment data to individual academic programs, and (4) accomplish the State Regents’ mandate for assessing student and alumni satisfaction.

Methods

Population. The target population for this survey was OSU graduate degree recipients who graduated in 2003 and 2007. Alumni response rates for individual programs are listed in Table 1. This included all departments in the Colleges of Agricultural Sciences and Natural Resources, Arts and Sciences, Spears School of Business, Education, Engineering, Architecture and Technology, and Human Environmental Sciences, and the Graduate College. The total number of alumni in the target population was 2,195, all graduate degrees granted in 2003 and 2007. After accounting for deceased alumni (n=2) and alumni who obtained more than one degree in 2003 and/or 2007 (n=17), attempts were made to reach 2,176 alumni. The survey was conducted in January and February 2009; therefore, alumni were contacted approximately one and five years after graduating from OSU.

Instrument Design. The Assessment Council and the individual academic departments that participated in the survey developed the survey instrument. The first part of the survey, called the ‘common questions,’ was given to all alumni. It included questions on current employment, continuing education, and overall satisfaction. The second part of the survey was developed by each participating academic unit and was only given to alumni of that unit. This part of the survey focused on specific aspects of the alumnus’ degree program.

Survey Administration. The survey was administered online and as a telephone interview. The office of University Assessment and Testing (UAT) sent three rounds of survey emails in January and conducted telephone interviews in February. The office of Institutional Research and Information Management and the OSU Foundation provided alumni email addresses and telephone numbers. The office of University Assessment and Testing coordinated the development of the survey instrument, conducted data collection and analysis, and prepared the reports.
Results

Response Rate. A total of 989 alumni interviews were completed, resulting in an overall response rate of 45.1% (Table 1). Out of the initial target population of 2,195 alumni, 973 alumni could not be reached because either there was no phone number available or the number was deemed ‘unreachable’ (e.g., wrong number, disconnected), 2 alumni were deceased, and 17 alumni had two degrees but contact attempts were only made related to one. After accounting for unreachable and duplicate alumni, the overall adjusted response rate was 82.2% (Table 1).

Out of the total population of survey respondents, 17.5% were alumni of the College of Arts & Sciences, 19.5% were from the Spears School of Business, 8.9% were from the College of Agricultural Sciences and Natural Resources, 19.2% were from the College of Engineering, Architecture and Technology, 5.5% were from the College of Human Environmental Sciences, 20.2% were from the College of Education, and 9.2% were from the Graduate College.

Current Employment Information. 91.5% of alumni (n=904) reported that they were employed (Q1). Of these, 91.1% were employed full-time (Q4). Approximately 36.5% were employed by educational institutions; 29.1% of alumni described their employer as large corporations; 15.5% were employed by small corporations or small businesses; 11.6% were employed by government agencies; 4.5% were employed by nonprofit organizations and 1.9% were self-employed (Q3). Table 2 summarizes the names of alumni employers and job titles. The most frequently reported annual salary range for master’s and doctoral alumni one and five years post-graduation was at least $75,000 and less than $100,000 per year (17.7%). 11.9% of alumni reported annual salaries of $100,000 per year or greater, and 62.0% of alumni reported annual salaries of less than $75,000 per year (Q7). In general, 92.8% of alumni responded that their graduate program prepared them very well or adequately for their current position (Q6). Only respondents who reported that their current position was slightly, moderately, or highly related to their degree program were included in this calculation.

Graduate/Professional School Information. Of the alumni surveyed, 177 (18.2%) had completed or were currently enrolled in a graduate or professional school. Of these alumni, 51.7% were pursuing or had completed a doctoral degree, 23.8% were pursuing or had completed a Master’s degree, 8.7% were pursuing or had completed a business degree, 2.9% were pursuing or had completed a medical degree, 0.6% were pursuing or had completed a veterinary medicine degree, none were pursuing or had competed a law degree, and 9.9% were pursuing or had completed ‘other’ degrees (Q9). Of the 161 alumni who reported the name of the school they were attending or from which they had completed graduate school, 52.8% (n=85) attended Oklahoma State University, and 6.2% attended graduate school at other Oklahoma institutions. Most alumni (89.2%) stated that their OSU graduate program had prepared them very well or adequately for additional graduate or professional school programs (Q10). Table 3 summarizes the names of graduate and professional schools as given by alumni.

Resident Information (in-State / Out-of-State). 54.7% of the alumni who participated in the survey were living in Oklahoma and 45.3% were out-of-state (Table 4).

This report summarizes data from the Common Questions that were given to all alumni. Alumni were also given a set of questions that were developed by the academic program from which they received their degree. Results of program-specific survey questions are summarized in separate reports prepared for each participating academic unit. If you would like to receive a copy of a specific report, please contact the OSU office of University Assessment and Testing at (405)744-6687.
Table 1. Number of alumni in the target population (graduate degree recipients from 2003 and 2007), number of completed surveys, and response rates for each college and department. Response rate is the number of completed surveys divided by the initial number of alumni. The adjusted response rate is the number of completed surveys divided by the number of alumni who were ‘reachable’ (i.e., alumni who responded to a survey email or for whom we had a valid U.S. telephone number).

Table 2. Names of employers and position titles for alumni of graduate programs who graduated in 2003 and 2007. Data are summarized for each academic department that participated in the survey. Note that the names of employers and position titles are given in the alumnus' own words. Because some surveys were conducted via telephone, employer names may not be spelled correctly.
