Executive Summary

The 2006 OSU Survey of Alumni of Undergraduate Programs was conducted to identify institutional strengths and areas for improvement as indicated by recent graduates; to track the career and continuing education trends of recent graduates; to assess achievement of learning outcomes as perceived by alumni from individual academic programs, and to accomplish the State Regent's mandate for assessing student and alumni satisfaction. The survey was conducted in January, February and March 2006 and targeted alumni of undergraduate programs who graduated in calendar years 2000 and 2004. The survey was administered as a telephone interview and included Common Questions (related to employment and continuing education) and questions related to program outcomes for each degree program.

- *Response Rate.* A total of 2,628 telephone interviews with alumni were completed, resulting in a response rate of 40.8%. When adjusted for alumni for whom a telephone number could not be determined and alumni who could not be reached in the U.S., the response rate to the survey was 68.8%.
- *Residency.* An estimated 67% of the alumni who participated in the survey were living in Oklahoma, and 33% were contacted out-of-state. Because the survey did not attempt to reach alumni who were not in the U.S., the number of alumni who no longer live in Oklahoma may be underestimated.
- *Employment.* Approximately 86% of alumni reported that they were employed. Most alumni reported working for large corporations (37%) or small corporations or businesses (24%). 21% were employed by educational institutions, and 8.4% were employed by government agencies. Alumni most frequently reported that their annual salary was in the range of \$25,000 - \$34,999 per year (24%). More than 94% of employed alumni reported that their OSU education had prepared them very well or adequately for their current position.
- *Continuing Education.* Almost 31% of alumni had completed or were currently enrolled in graduate programs or professional schools. More than 42% of these were enrolled in or had attended OSU graduate programs. 62% were pursuing or had completed Master's degrees, 11% were pursuing or had completed medical degrees, 7.6% were pursuing or had completed law degrees, 7.3% were pursuing or had completed doctoral degrees, and 5.3% were pursuing or had completed business degrees. Almost 93% of alumni that went on to graduate or professional school stated that their OSU education had prepared them very well or adequately for their continued education.

Introduction

In a comprehensive assessment effort, many voices must be heard in order to gain a thorough understanding of the effectiveness of the curricula. Because the focus of assessment is on helping improve the preparation of graduates, one approach to addressing questions about preparation for the workplace is to ask graduates themselves (Banta and Palomba 1999). Alumni provide a logical source of evaluative feedback and a unique perspective on the application of curricula in practice.

Information from alumni also plays an important role in the process of academic assessment. Higher education in the United States has been undergoing critical scrutiny whereby parents, students, and government leaders alike are increasingly calling into question the value of a college degree. This scrutiny is fueled by the well-documented escalation of the costs of college attendance over the past two decades and concerns about the employment prospects and even the employability of college graduates (McGuire and Casey 1999). Against this backdrop, the pressure on colleges and universities to maximize and demonstrate effectiveness is at an all-time high. Because a college education is a lifelong investment with presumed dividends accruing for many years after graduation, it is logical to seek out answers to the public's legitimate concerns through alumni surveys. Data from alumni surveys can be a valuable part of assessment efforts aimed at providing public accountability as well as evaluative information that can be used for program improvement.

The Oklahoma State University Undergraduate Program Alumni Survey that was conducted in January, February and March 2006 sought, among other things, to identify the extent to which recent undergraduate program alumni were satisfied that they had received quality training in professional skills and abilities at OSU (Stillwater). The survey provided data to (1) identify institutional strengths and areas for improvement as indicated by recent graduates; (2) track the career trends of recent OSU undergraduate program alumni; (3) provide outcomes assessment data to individual academic programs, and (4) accomplish the State Regents' mandate for assessing student and alumni satisfaction.

Methods

Population. The target population for this survey was OSU undergraduate degree recipients who graduated in **2000** and **2004**. Alumni response rates for individual programs are listed in Table 1. This included all departments in the Colleges of Agricultural Sciences and Natural Resources; Arts and Sciences; Engineering, Architecture, and Technology; Education; and Human Environmental Sciences; and the Spears School of Business. The total number of alumni in the target population was 6,440. The survey was conducted in January, February and March 2006; therefore, alumni were contacted approximately one and five years after graduating from OSU.

Instrument Design. The Assessment Council and the individual academic departments that participated in the survey developed the survey instrument. The first part of the survey, called the Common Questions, was given to all alumni. It included questions on current employment, continuing education, and overall satisfaction. The second part of the survey was developed by each participating academic unit and was only given to alumni of that unit. This part of the survey focused on specific aspects of the alumnus' degree program.

Survey Administration. The survey was administered as a telephone interview. The OSU Bureau for Social Research conducted the survey telephone interviews in January, February and March 2006 and coordinated data collection. The Office of Institutional Research and Information Management, the OSU Foundation, and individual academic departments provided alumni telephone numbers. The Office of University Assessment and Testing coordinated the development of the survey instruments, efforts to obtain accurate alumni telephone numbers, data analysis, and report preparation.

Results

Response Rate. A total of 2,628 alumni telephone interviews were completed, resulting in an overall response rate of 40.8% (Table 1). Out of the initial target population of 6,440 alumni, 2,623 alumni could not be reached because either there was no U.S. phone number available or the number was deemed 'unreachable' (e.g., wrong number, disconnected). After accounting for 'unreachable' alumni, the overall adjusted response rate was 68.8% (Table 1).

Of the total population of survey respondents, 26.2% were alumni from the College of Arts & Sciences, 23.6% were alumni from the Spears School of Business, 15.5% were alumni from the College of Agricultural Sciences and Natural Resources, 13.1% were alumni from the College of Engineering, Architecture and Technology, 12.4% were alumni from the College of Education, and 9.2% were alumni from the College of Human Environmental Sciences.

Current Employment Information. 85.5% of alumni (n=2,248) reported that they were employed (CQ1). Of these, 89.2% were employed full-time (CQ4). Approximately 36.7% of alumni described their employer as large corporations and 23.6% were employed by small corporations or small businesses; 21.4% were employed by educational institutions; 8.4% were employed by government agencies; 4.8% were employed by nonprofit organizations and 5.2% were self-employed (CQ3). Table 2 summarizes the names of alumni employers and job titles. The most frequently reported annual salary range for alumni one and five years post-graduation was \$25,000 - \$34,999 per year (23.5%). 60.1% of alumni reported annual salaries of \$35,000 per year or greater, and 10.1% of alumni reported annual salaries of less than \$25,000 per year (CQ7). In general, 94.3% of alumni (n=1,774) responded that their undergraduate program prepared them very well or adequately for their current position (CQ6). Only respondents who reported that their current position was slightly, moderately, or highly related to their degree program were included in this calculation.

Graduate / Professional School Information. Of the alumni surveyed, 801 (30.5%) had completed or were currently enrolled in a graduate or professional school. Of these alumni, 61.7% were pursuing or had completed a Master's degree, 11.0% were attending or had attended medical schools, 7.6% were pursuing or had completed law degrees, 7.2% were pursuing or had completed doctoral degrees, 5.2% were pursuing or had completed business degrees, and 3.1% were pursuing or had completed 'other' degrees (CQ9). Of the 801 alumni who were attending or had completed graduate school, 42.3% (n=339) attended Oklahoma State University, and 30.0% attended graduate school at other Oklahoma institutions. Most alumni (92.5%) stated that their OSU undergraduate program had prepared them very well or adequately for graduate or professional school programs (CQ10). Table 3 summarizes the names of graduate and professional schools as given by alumni.

Resident Information (In-State / Out-of-State). Approximately 67.4% of the alumni who participated in the survey were living in Oklahoma and 32.6% were out-of-state (Table 4). Because the survey did not attempt to reach alumni who were not in the U.S., the alumni who live outside of Oklahoma may be underrepresented.

This report summarizes data from the Common Questions that were given to all alumni. Alumni were also given a set of questions that were developed by the academic program from which they received their degree. Results of program-specific survey questions are summarized in separate reports prepared for each participating academic unit. If you would like to receive a copy of a specific report, please contact the OSU Office of University Assessment and Testing at 744-6687.

Table 1. Number of alumni in the target population (undergraduate recipients from 2000 and 2004), number of completed telephone interviews, and response rates for each college and department. Response rate is the number of completed surveys divided by the initial number of alumni. The adjusted response rate is the number of completed surveys divided by the number of alumni who were 'reachable' (i.e., alumni for whom we had a valid U.S. telephone number).

Table 2. Names of employers and position titles for alumni of undergraduate programs who graduated in 2000 and 2004. Data are summarized for each academic department that participated in the survey. Note that the names of employers and position titles are given in the alumnus' own words. Because the survey was conducted via telephone, employer names may not be spelled correctly.
