## **Executive Summary**

The 2008 OSU Survey of Alumni of Undergraduate Programs was conducted to identify institutional strengths and areas for improvement as indicated by recent graduates; to track the career and continuing education trends of recent graduates; to assess achievement of learning outcomes as perceived by alumni from individual academic programs; and to accomplish the State Regent's mandate for assessing student and alumni satisfaction. The survey was conducted in January through April 2008 and targeted alumni of undergraduate programs who graduated in calendar years 2002 and 2006. The survey was administered as an online survey and as a telephone interview, and included Common Questions (related to employment and continuing education) as well as questions related to program outcomes for each degree program.

- *Response Rate.* A total of 1407 surveys were completed online by alumni, and 1141 were completed through telephone interviews, resulting in a response rate of 37.1%. When adjusted for alumni deemed 'unreachable,' i.e. who did not respond to a survey email and for whom no valid US phone number was available, the response rate to the survey was 65.8%.
- *Residency.* An estimated 67.4% of the alumni who participated in the survey were living in Oklahoma, and 32.6% were contacted out-of-state.
- *Employment.* Approximately 86.9% of alumni reported that they were employed. Most alumni reported working for large corporations (33.0%) or small corporations or businesses (25.8%). 18.2% were employed by educational institutions, and 12.3% were employed by government agencies. Alumni most frequently reported that their annual salary was in the range of \$25,000 - \$34,999 per year (22.6%). About 91.6% of employed alumni reported that their OSU education had prepared them very well or adequately for their current position.
- *Continuing Education.* About 33.0% of alumni had completed or were currently enrolled in graduate programs or professional schools. 43.9% of these were enrolled in or had attended OSU graduate programs. 58.7% were pursuing or had completed Master's degrees, 8.7% were pursuing or had completed medical degrees, 6.7% were pursuing or had completed law degrees, 3.8% were pursuing or had completed doctoral degrees, and 12.0% were pursuing or had completed business degrees. Almost 91.7% of alumni that went on to graduate or professional school stated that their OSU education had prepared them very well or adequately for their continued education.

## Introduction

In a comprehensive assessment effort, many voices must be heard in order to gain a thorough understanding of the effectiveness of the curricula. Because the focus of assessment is on helping improve the preparation of graduates, one approach to addressing questions about preparation for the workplace is to ask graduates themselves (Palomba & Banta, 1999). Alumni provide a logical source of evaluative feedback and a unique perspective on the application of curricula in practice.

Information from alumni also plays an important role in the process of academic assessment. Higher education in the United States has been receiving critical scrutiny whereby parents, students, and government leaders alike are increasingly calling into question the value of a college degree. This scrutiny is fueled by the well-documented escalation of the costs of college attendance over the past two decades and concerns about the employment prospects and even the employability of college graduates (McGuire & Casey, 1999). Against this backdrop, the pressure on colleges and universities to maximize and demonstrate effectiveness is at an all-time high. Because a college education is a lifelong investment with presumed dividends accruing for many years after graduation, it is logical to seek out answers to the public's legitimate concerns through alumni surveys. Data from alumni surveys can be a valuable part of assessment efforts aimed at providing public accountability as well as evaluative information that can be used for program improvement.

The Oklahoma State University Survey of Alumni of Undergraduate Programs that was conducted in January through April 2008 sought, among other things, to identify the extent to which recent undergraduate program alumni were satisfied that they had received quality training in professional skills and abilities at OSU. The survey provided data to (1) identify institutional strengths and areas for improvement as indicated by recent graduates; (2) track the career trends of recent OSU undergraduate program alumni; (3) provide outcomes assessment data to individual academic programs; and (4) accomplish the State Regents' mandate for assessing student and alumni satisfaction.

## Methods

*Population.* The target population for this survey was OSU undergraduate degree recipients who graduated in **2002** and **2006**. This included all departments in the Colleges of Agricultural Sciences and Natural Resources; Arts and Sciences; Engineering, Architecture, and Technology; Education; Human Environmental Sciences; and the Spears School of Business. The total number of alumni in the target population was 6,769. The survey was conducted in January through April 2008; therefore, alumni were contacted approximately one and five years after graduating from OSU.

*Instrument Design.* The OSU Assessment Council and the individual academic departments that participated in the survey developed the survey instrument. The first part of the survey, called the Common Questions, was given to all alumni. It included questions on current employment, continuing education, and overall satisfaction. The second part of the survey was developed by each participating academic unit and was only given to alumni of that unit. This part of the survey focused on specific aspects of the alumnus' degree program.

*Survey Administration.* The survey was administered online and as a telephone interview. The office of University Assessment and Testing (UAT) sent three rounds of survey emails between late January and mid-March, and conducted telephone interviews from mid-February through April. The office of Institutional Research and Information Management and the OSU Foundation provided alumni email addresses and telephone numbers. The office of University Assessment and Testing coordinated the development of the survey instrument, conducted data collection and analysis, and prepared the reports.

## **Results**

*Response Rate.* A total of 1407 surveys were completed online by alumni, and 1141 alumni participated in the survey through a telephone interview, resulting in an overall response rate of 37.1% (Table 1). In the telephone interviews, interviewers completed the online survey as the interview was conducted. Out of the initial target population of 6,769 alumni\*, 2,899 alumni were deemed 'unreachable,' defined as those for whom no valid email address was available or who did not respond to email invitations to participate, and for whom no valid U.S. telephone number was available. Receipt of email messages could not be confirmed. After accounting for 'unreachable' alumni, the overall adjusted response rate was 65.8% (Table 1).

Of the total population of survey respondents, 29.1% were graduates of the College of Arts & Sciences; 25.0%, the Spears School of Business; 13.5%, the College of Agricultural Sciences and Natural Resources; 13.4%, the College of Engineering, Architecture and Technology; 10.2%, the College of Education; and 8.8%, the College of Human Environmental Sciences.

*Current Employment Information.* 86.9% of alumni (n=2213) reported that they were employed (CQ1). Of these, 90.2% were employed full-time (CQ4). Approximately 33.0% of alumni described their employer as large corporations and 25.8% were employed by small corporations or small businesses; 18.2% were employed by educational institutions; 12.3%, by government agencies; 5.9%, by nonprofit organizations; and 3.6% were self-employed (CQ3). Table 2 summarizes the names of alumni employers and job titles. The most frequently reported annual salary range for alumni one and five years post-graduation was \$25,000 - \$34,999 per year (22.6%). 63.4% of alumni reported annual salaries of \$35,000 per year or greater, and 7.7% reported annual salaries of less than \$25,000 per year (CQ7). In general, 91.6% of alumni (n=1643) responded that their undergraduate program prepared them very well or adequately for their current position (CQ6). Only respondents who reported that their current position was slightly, moderately, or highly related to their degree program were included in this calculation.

*Graduate / Professional School Information.* 33% (n=825) of the alumni surveyed had completed or were currently enrolled in a graduate or professional school. Of these alumni, 58.7% were pursuing or had completed a Master's degree, 8.7% were attending or had attended medical schools, 6.7% were pursuing or had completed law degrees, 3.8% were pursuing or had completed doctoral degrees, 12.0% were pursuing or had completed business degrees, 3.7% were pursuing or had completed veterinary degrees, and 6.3% were pursuing or had completed 'other' degrees (CQ9). Of the 825 alumni who were attending or had completed graduate school, 43.9% (n=362) attended Oklahoma State University, and 21.2% attended graduate school at other Oklahoma institutions. Most alumni (91.7%) stated that their OSU undergraduate program had prepared them very well or adequately for graduate or professional school programs (CQ10). Table 3 summarizes the names of graduate and professional schools as given by alumni.

*Resident Information (In-State / Out-of-State).* Approximately 67.4% of the participating alumni who provided a zip code were living in Oklahoma and 32.6% were out-of-state (Table 4).

\*6,861 degrees were conferred to 6,769 alumni. Attempts were made to contact alumni who had obtained more than one degree in 2002 or 2006 (n=92) only regarding the most recent degree (if applicable) or the degree from the smaller program.

This report summarizes data from the Common Questions that were given to all alumni. Alumni were also given a set of questions that were developed by the academic program from which they received their degree. Results of program-specific survey questions are summarized in separate reports prepared for each participating academic unit.

**Table 1.** Number of alumni in the target population (undergraduate recipients from 2002 and 2006), number of completed surveys, and response rates for each college and department. Response rate is the number of completed surveys divided by the initial number of alumni. The adjusted response rate is the number of completed surveys divided by the number of alumni who were 'reachable' (i.e., alumni who responded to a survey email or for whom we had a valid U.S. telephone number).

**Table 2. Names of employers and position titles for alumni of undergraduate programs who graduated in 2002 and 2006.** Data are summarized for each academic department that participated in the survey. Note that the names of employers and position titles are given in the alumnus' own words. Because some surveys were conducted via telephone, employer names may not be spelled correctly.
