## Overview

Oklahoma State University is highly committed to excellence in academic and co-curricular programs. To that end, Oklahoma State University is engaged in a continual process of assessing the strengths and weaknesses of its programs. The Office of University Assessment and Testing (UAT) conducts annual alumni surveys on a rotating schedule between alumni of graduate and undergraduate programs. Such surveys provide us with an opportunity to understand students' experiences as well as the perceived role of educational programs in the fulfillment of personal and career-related goals.

UAT implemented the 2013 OSU Survey of Alumni of Graduate programs to identify strengths and weaknesses as viewed by recent graduates, to track career and continuing education, and to assess student learning outcomes. Alumni surveys align with the State Regents' mandate for assessing student and alumni satisfaction. This survey was conducted in January through May of 2013 for alumni who graduated either in 2007 or 2011. UAT administered the survey both online and through telephone interviews.

A student prepares to graduate.

This report summarizes data from a set of common questions given to all survey participants. Alumni also responded to a set of questions developed by the academic program from which they received their degree. Results for specific degree programs are provided in separate reports prepared for each academic unit. If you would like to receive a copy of a specific report, please contact UAT at (405) 744-6687.

### *Response Rate*

A total of 887 alumni completed the survey, resulting in a response rate of 37%. A total of 712 alumni were considered unreachable by phone. When adjusted for alumni for whom a valid telephone number could not be determined and alumni who could not be reached by telephone in the US, the response rate to the survey was 53%.

### *Employment*

Over 98% of doctoral alumni and 92% of master's alumni reported current employment. Only 3% of respondents, primarily Master's degree recipients, were unemployed and currently seeking employment.

Of the employed respondents, about 90% indicated that they were employed full-time.

Less than 6% of alumni reported working in a sector that was "not at all related" to their graduate studies at OSU. Most survey participants said that they worked for educational institutions (35%) or large corporations (31%). About 15% of alumni worked for small businesses and 12% were employed by federal, state, or local governments.

The salary range with the largest number of respondents was \$75,000-\$100,000 per year (19%). Nearly 13% reported a salary above \$100,000 per year, while 13% reported a salary range of \$45,000-55,000.

Nearly 92% of respondents agreed that their graduate studies prepared them for their current position.

#### *Continuing Education*

Over 19% of alumni had completed or were currently enrolled in additional graduate programs or professional schools. About 53% of the alumni who had attended or were currently enrolled in additional graduate programs or professional schools chose OSU for this additional education. About 53% of students who completed a master's degree at OSU were pursuing or had completed a doctoral degree and 22% were pursuing or had completed an additional master's degree.

Over 88% of alumni who pursued additional education reported that their graduate programs at OSU prepared them very well or adequately for their additional education.

#### *Satisfaction*

Alumni were very satisfied with their educational experiences at OSU. 91% of respondents were satisfied or very satisfied with their overall educational experiences at OSU.

#### *Community Involvement*

56% of respondents spent one or more hours per week volunteering in community groups or organizations while 41% of respondents reported no hours volunteering in a typical week. 59% of respondents felt very well or adequately prepared to contribute to the welfare of their communities.

#### *Residency*

52% of the alumni who participated in the survey were living in Oklahoma and slightly over 37% were living out-of-state. State of residency was unknown for the remaining respondents.

## Methods

The target population for this survey was OSU graduate degree recipients who graduated in 2007 and 2011. This included all departments in the Colleges of Agricultural Sciences and Natural Resources, Arts and Sciences, Spears School of Business, Education, Engineering, Architecture and Technology, and Human Sciences, and the Graduate College. The total number of alumni in the target population was 2,389. UAT conducted the survey in January through April of 2013; therefore, alumni were contacted approximately one and five years after graduating from OSU.

Students receive instruction in a lab.

### *Instrument Design*

The Assessment and Academic Improvement Council (AAIC) and the individual academic departments that participated in the survey developed the survey instrument. The first part of the survey, called the 'common questions,' was given to all alumni. It included questions on current employment, continuing education, and overall satisfaction. This year AAIC also developed additional common questions related to community service.

Each participating academic unit developed its own questions for the second part of the survey. If an academic unit did not provide specific questions, alumni were asked 8 general questions

developed by UAT that addressed perceived satisfaction, effectiveness, strengths, weaknesses, and quality of the OSU graduate student experience.

### *Survey Administration*

The survey was administered online and as a telephone interview. The Office of University Assessment and Testing (UAT) sent three rounds of survey emails in January and conducted telephone interviews in February through May of 2013. The Office of Institutional Research and Information Management provided alumni's email addresses and telephone numbers. UAT coordinated the development of the survey instrument, conducted data collection and analysis, and prepared the reports.

## Results

### *Response Rate*

A total of 887 alumni completed the survey from a target population of 2,389 graduates for a response rate of 37%. Of the target population, 712 alumni were unreachable. The absolute response rate is calculated as the number of completed surveys divided by the total number of alumni. The adjusted response rate is the number of completed surveys divided by the number of alumni who were 'reachable' (i.e., alumni who responded to a survey email or for whom we had a valid U.S. telephone number). When accounting for unreachable alumni, the overall adjusted response rate is nearly 53%. The absolute response rate for each college ranged from 36% to 41% while the adjusted response rate for each college ranged from 48% to 59%.

	Number of Alumni	Number of Completed Surveys	Response Rate (%)	Adjusted Response Rate (%)
<b>The Entire Survey Population</b>	2389	887	37.1%	52.9%

*Continuing Education and Graduate / Professional School Information*

About 19% (n = 168) of respondents had completed an additional graduate degree or were currently enrolled in a graduate or professional school. Of these, approximately 53% were pursuing or had completed a doctoral degree and 22% were pursuing or had completed an additional master's degree (Q9). Of the alumni who pursued additional education, about 60% (n = 89) attended OSU for an additional degree. About 88% of alumni reported that their degree program at OSU prepared them adequately or very well for their subsequent education (Q10).

*Community Involvement*

Many graduate alumni reported spending time volunteering in their community. About 56% of respondents indicated that they spent at least 1-5 hours per week volunteering (Q12). About 62% of participants stated that their OSU degree program prepared them adequately or very well to contribute to the welfare of their community (Q13).

Q12. In a typical week, about how many hours do you spend volunteering in community groups or organizations?				
	Master's		Doctorate

### Residency

Each alumnus who completed the survey was asked to provide his or her current zip code. This zip code was used to identify the state of current residence. 52% of survey respondents resided in Oklahoma. 28% of the respondents who reported living in Oklahoma lived in Stillwater. An additional 16% of respondents lived in surrounding states while 19% lived outside the surrounding geographic area. 11% of the respondents failed to provide a valid zip code.
